900	10800	1350	600		
1000	12000	1500	666	13	4

DIRECTIONS.

The Numbers in the first Column from 1 to 1000, serve for the 3 different Species of Money to be reduced, viz for lib. Ster. lib. Scots and Merks, as for Exam. How many lib. Scots are there in 30 lib. Ster. look in the 1. Column for the Num. 30, and opposite to it in the Col. under lib. Scots, you have 360 lib. which answers the Question.

Again, How many Mks. are there in 30 lib. Scots? look for 30 in the 1. Col. and opposite to it in the Col. under Mks. you have 45 Mks. which is the Answer.

Again, How many lib. are there in 30 Mks. look the 1. Col. for 30, and opposite to it in the last Col. under lib. sh. d. and you have 20 lib. which is the Answer.

An EXAMPLE of DISCOUNT

Suppose you buy from a Merchant, Goods to the Value of 100 Pound, to be paid at a Year's End; but you agree for present Payment, he discounting to you at the Rate of 6 per Cent. per Annum, The Question is, What you are to pay in ready Money? To find out this, look for 100 lib. in the first Column, and opposite to it, in the Table of Discount, you have Pounds Shil. Pen. Parts 94 - 6 - 9 - 2 which is the Sum you are to pay him in ready Money; and this may serve as a Direction for other Sums in this Table of Discount.

Nota, In the first Table of Reduction of Money, the Guineas are reckoned at 21 sh. Ster. the Piece.

DIRECTIONS and EXAMPLES.

IN the Tables you have marked at the Head, the Rates *per Cent.* and the Number of Months over the Columns of Interest for these Months, answerable to the Principal Sums, which stand opposite to them in the first Column, marked at the Head *Principal.*

For Example, To find the Interest of 145 lib. 15 sh. for 7 Months, at the Rate of $5\frac{1}{2}$ *per Cent.* First, Find out the Table of Interest at $5\frac{1}{2}$ *per Cent.* then in the Column of Principals, find out the Parts whereof your Principal Sum is composed, and opposite thereto, under the 7 Month, the Interest for that Time is justly marked, and these being added together, make the true Interest thus,

Principal.	Interest for 7 Months.			
lib. sh.	lib.	sh.	Pen.	Pts.
100 --	3	4	2	--
40 --	1	5	8	--
5 --	--	3	2	20
-- 15	--	--	5	31
145-15	is 4-13-6-11			

Another Example, To find the Interest of 1356 lib. 6 sh. 8 Pen. for 9 Months at 5 *per Cent.* I state here 6 sh. 8. Pen. Because, That in *Scotts* Payments, Merks and Half Merks frequently occur, and that the same are not in the Tables, may be thus supplied, by taking the third Part of the Interest of one Pound for Half a Merk, and the Double of that; or two third Parts of the Interest of one Pound for a Merk, and so proceed as in the former Example thus,

Principal.	Interest for 9 Months.		
lib. sh. d.	lib.	sh.	d.
1000 -- --	37	10	0
300 -- --	11	5	--
50 -- --	1	17	6
6 -- --	--	4	6
- - 6 8	--	--	3
1356-6-8	is 50-17-3		

If your Sum proposed be 1, 3, 4, or 5000 lib. multiply the Interest of 1000 lib. by the Number of thousands proposed, and you have your Desire.

And if 2, 3, 4 or more Number of Years be proposed, multiply the Interest of one Year by the Number of Years proposed, and your Question is answered.

And if any Time below a Month be proposed, follow this Method, viz. for 15 Days, take the Half of a Month's Interest, and for 10 Days, take the third of a Month, and for 6 Days, the 5th Part of a Month, and for 3 Days take the Half of 6 Days.

And if ye would know the Interest of 1000 lib. for one Day at 5 per Cent. take the 30th Part of 1000 lib. which is 33 lib. 6 sh. 8 Pen, the Interest thereof for a Month will answer to the Interest of 1000 lib. for a Day, which is 2 sh. 9½ Pen. and by this Method you may find out the Interest of other Sums for any Day.

Note. At the Rate of 4 per Cent. in the Tables, the Parts of 1 Penny are 5, and five fiftths make 1 Penny.

At the Rates of 4½ and 5½ per Cent. the Parts of a Penny are 40, which make a Penny, 20 Parts make a Half Penny, 10 Parts make a Farthing, or 4th Part of a Penny.

At the Rate of 5 per Cent. the Parts are 4, which make a Penny, 2 Parts make a Half Penny, 1 Part makes a Farthing or 4th Part of a Penny.

At the Rate of 6 per Cent. the Parts are 10, which make a Penny, 5 Parts make Half a Penny, and 3 Parts a little more than a Farthing, or Quarter of a Penny.

The Tables of Reduction of Money have Directions at the Head and Side of the Columns, and are so plain that they need no further Examples.

Note. That in the first Example in the foregoing Page at 5½ per Cent. for 7 Months, there are 11 Forty Parts of a Penny, which make a Farthing or Quarter of a Penny, and a 40th Part of a Penny, which is inconsiderable.

FINIS.
